We are pleased to let you know that the ICARUS Newsletter will be sent to you regularly again!

ICARUS-IBD Updates:

The first batch of samples from **Oxford, Belgium and Japan** have been tested for seroprevalence rates before vaccination. We have received some data back and hoping to update you at the next meeting! New York are gathering their first round of samples along with Chicago and Miami to be sent for testing. The **minimal dataset** has been sent to sites who currently do not have access to REDCap, if you have any questions regarding this, please do get in touch – we are happy to help!

Site recruitment as of 24/09/21.

RECRUITMENT

Current total: 3480 Current forecast: 4788

We are approaching some sites to assess the possibility of collecting control samples. We believe this will be a very interesting comparison to have for the study. If we have not already discussed and you think this may be possible for your site, please contact the team.

The next international site meeting is scheduled for **Tuesday 28th September at 3pm (BST)**. Please ensure 1 member from your site attends to give a site update.
